DETAILED ACTION

Priority

As noted in the notice mailed 08 March 2004 to the applicant, an appropriate reference to International Application PCT/IL02/00069 has not been made. The file wrapper for US Application 10/442,495 makes neither claim nor reference to continuity between itself and said International Application (or any other application for that matter), nor is said US application a National Stage Entry of said International Application. In addition, the period for inserting a correct reference has elapsed. As such, Rembrand et al. WO/02/09472 A2 appears to still be a valid reference. Examiner respectfully declines to withdraw the rejections based on *Rembrand* since the petition has not been granted and will likely not be granted because application 10/442,495 was simply not a continuation of any other applications.

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 14 November 2007 has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. **Claims 1-5, 15, 16, 18, 21-34, 36, 37, 39, 40, 42, 44, 48, 49, 52, 53 and 56 are rejected under 35**

U.S.C. 102(b) as being anticipated by Rembrand et al. WO 02/09473 A2).

These claims are rejected for the same reasons presented in the Non-Final Office Action filed 16 March 2006 and incorporated herein by reference.

2. **Claims 6 and 51 are rejected under 35 U.S.C. 102(b) as being anticipated by Rembrand in view of the Mackie 1202VLZ Pro Mixer Owner's Manual (available at: http://www.mackie.com/pdf/1202vlzpro_om.pdf).**

These claims are rejected for the same reasons presented in the Non-Final Office Action filed 16 March 2006 and incorporated herein by reference.

3. **Claims 1, 20, 21 and 35 are rejected under 35 U.S.C. 102(b) as being anticipated by Kandel et al. (US Patent 6,353,671).**

These claims are rejected for the same reasons presented in the Non-Final Office Action filed 16 March 2006 and incorporated herein by reference.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. **Claims 43, 45, 46, 47 and 50 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rembrand.**

These claims are rejected for the same reasons presented in the Non-Final Office Action filed 16 March 2006 and incorporated herein by reference.

5. **Claims 19, 54 and 55 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rembrand in view of Bauer (US Patent 3,475,566).**

These claims are rejected for the same reasons presented in the Non-Final Office Action filed 16 March 2006 and incorporated herein by reference.

6. **Claims 7-12, 38 and 41 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rembrand in view of Stockham, Jr. et al. (US Patent 5,500,902) and further in view of Anderson (US Patent 4,396,806).**

These claims are rejected for the same reasons presented in the Non-Final Office Action filed 16 March 2006 and incorporated herein by reference.

7. **Claims 14 and 57 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rembrand in view of Stockham in view of Anderson and further in view of Sandlin (Textbook of Hearing Aid Amplification, © 2000).**

These claims are rejected for the same reasons presented in the Non-Final Office Action filed 16 March 2006 and incorporated herein by reference.

Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter:

8. **Claims 13, 17 and 58 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.**

Claim 13 is limited to “the system according to claim 12,” as covered by *Rembrand* in view of Stockham and further in view of Anderson. None of the cited prior art either teaches providing an ambient sound amplitude signal to an A/D converter using a band-pass filter in the manner claimed. Thus, claim 13 is allowable over the cited prior art.

Claim 17 is limited to “the system according to claim 1,” as covered by *Rembrand*. None of the cited prior art teaches an otoacoustic emissions profile source providing an otoacoustic emissions profile for use in the compensatory signal generator. Thus, claim 17 is allowable over the cited prior art.

Claim 58 is substantially similar to claim 17, and is allowable over the cited prior art for at least the same reasons.

Response to Arguments

Applicant's arguments filed 18 September 2006 have been fully considered but they are not persuasive.

Apropos claims 1-12, 14-16 and 18-57 applicant alleges that *Rembrand* is not prior art, however, priority to the International Application has not been granted, and the petition for entry is still pending. Argument at 13. As such, *Rembrand* is still considered a valid reference under

35 U.S.C. 102(b). As this is applicant's only argument against *Rembrand*, the rejections of claims 1-12, 14-16 and 18-57 are maintained.

Apropos claims 1, 20, 21 and 35 applicant alleges regarding *Kandel* that (1) an earphone is not equivalent to a speaker and that (2) *Kandel* does not determining a compensatory waveform according to ear otoacoustic emissions. *Id.* at 14. These two statements constitute the entirety of applicant's argument, and are, therefore, mere allegation. No support for these positions is provided. Moreover, page 12, lines 19-20, of applicant's specification defines loudspeakers and earphones as equivalents. Regarding point (2), *Kandel* explicitly uses the phrase otoacoustic emission to describe the operation of the compensatory signal generator. *Kandel* at col. 9 ll. 42-57.
